Monkeyluv was an enjoyable collection of essays on evolution, society, biology, psychology, a slew of other -ologys & how they all come together to help give us a better understanding of ourselves. It was an enjoyable read on some extremely fascinating topics. That point leads me to the book's largest deficiency: some of the essays are too short.

'Monkeyluv': Primates Are People, Too - The New York Times  
Monkeyluv is a book of essays by Robert Sapolsky on animal (and human) behavior. I really loved A Primate's Memoir - his adventures in Africa studying baboons - so I got this on a whim. It's divided into three sections: the first, and most scientific, discusses the interactions of genes with the environments in which they're placed.
