History, on the other hand, has come to regard him as the figure who gave political cogency to the liberating ideas of the Enlightenment. His great pamphlets, *Rights of Man* and *Common Sense*, are now recognized for what they are—classic arguments in defense of the individual's right to assert his or her freedom in the face of tyranny.

Rights of Man and Common  
Sense by Thomas Paine  
Oxford World Classics

Thomas Paine was the first international revolutionary. His Common Sense (1776) was the most widely read pamphlet of the American Revolution--and his Rights of Man (1791-2), the most famous defense of the French Revolution, sent out a clarion call for revolution throughout the world. Paine paid the price for his principles: he was outlawed in Britain, narrowly escaped execution in France, and was vilified as an atheist and a Jacobin on his return to America.

The other thing that's striking in Common Sense --a note also resounded in Rights of Man --is the heady optimism, of the belief in the chance for fundamental and radical change: "We have it in our power to begin the world over again." These works are also a surprisingly lively read.
