~~Lecture #9: Concurrent Processes~~

1. Concurrent Programs

A concurrent program consists of a collection of processes and shared objects. Each process is defined by a

sequential program; the shared objects allow these programs to cooperate in

accomplishing some task. The processes can

Bookmark File PDF Structured

be implemented by
multiprogramming,
where all

Concepts for concurrent
programming—Cornell
University

Simply described, it's
when you are doing
more than one thing at
the same time. Not to be
confused with

parallelism, concurrency
is when multiple

~~Concurrent computing~~
Wikipedia

The paper describes a new programming language for structured programming of computer operating systems. It extends the sequential programming language Pascal with concurrent

programming tools called processes and

Bookmark File PDF Structured

monitors. Part I explains these concepts informally by means of pictures illustrating a hierarchical design of a simple spooling system.
